English Wheeling Courses

Unit 1. Ashfield Farm,
Crowcombe, Taunton,
Somerset, TA4 4AW

www.englishwheelingcourses.co.uk

**ENGLISH
WHEELING
COURSES**

1 Day Introductory Course

- This 1 day course is designed to introduce you to the methods involved in hand forming and wheeling single and 3 dimensional curved metal panels
- Learn how to measure curved panels and create patterns to develop a jig in order to be able to reproduce specific body panels, how to align panels to create classic flowing lines and shape them using industrial tools including one of our 4 traditional English wheeling machines.
- We work in small groups of no more than 3, meaning you will receive plenty of hands-on tuition and won't have to wait for a turn on the equipment. This course offers a good introduction to craft panel beating, with practical skills that you can take away and practice at home - or as a pre-cursor to our more in-depth 3 day course.
- **Course Price: £360**

"I bought my own English wheel several years ago but I didn't really know how to use it. The 1 day course with Adrian has really opened my eyes to what I can achieve and I will definitely be back to do the advanced course as soon as I can"

- Mark Holbrook, Classic Car Owner

Course Dates

**Please check out the website
for available course dates.**

We may run additional courses
subject to availability – please
ask for details.

3 Day Advanced Course

- The 3 Day course offers a more intensive series of practical sessions, giving you the confidence to be able to use your own wheeling machine or continue elsewhere.
- Over the course of the 3 days we will cover techniques including gas welding with aluminium and TIG welding, metal finishing techniques, how to make patterns, how to shrink, stretch and shape metal and anneal aluminium alloy. We will also show you the best methods for flanging and wiring edges - and how to design and manufacture a jig in order to be able to prepare perfectly curved panels to fit specific measurements.
- We work in small groups of no more than 3, meaning you will receive plenty of hands-on one-to-one tuition, tailored to suit your individual skill level and the specific aspects of craft panel beating that you are most interested in.
- **Course Price: £925**
